Art Unit: 1755

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention.

The terms "measured quantity", "measured amount", and "weighed proportion" are all indefinite terms that do not particularly point out and distinctly claim applicants' invention.

The term "assaying...to determine magnitude of color change is vague because applicants do not particularly point out how they analyze and do not clearly define what they mean by magnitude of color change.

Claim 1 is also outside the scope of their disclosed invention because it requires a range of amounts of .0001 to 20 wt%. This should be in independent claim 1 (as it is in US Patent No. 6,706,111 B1).

It is expected that should applicants remove indefinite terms and add the required range that this application would be in condition for allowance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Marcantoni whose telephone number is 571-272-1373.
